# MICCAI Educational Challenge:

How do I organize my own medical imaging challenge? How do I develop my first deep learning model, or standardize my code for deployment and collaboration? What does an MRI have in common with a guitar? For the answers to all of these questions and more, tune into the *2020 MICCAI Educational Challenge (MEC).*

The MEC will be held for the fifth time, leading up to and concluding at MICCAI 2020. The goal of the challenge is to encourage members of the MICCAI community to create and share educational materials, covering fundamental concepts in medical image computing and computer-assisted interventions. Peruse the finalists of the 2020 challenge and the vast library of educational materials available through the [MEC website](). Tune in during the conference to cast your vote and help choose the 2020 MEC champions who will receive one of three cash prizes!
