## How to Work Effectively from Home

**Where:** Virtual meeting

**When:** 06th October 2020, 18:00-19:00 UTC

**How much:** Free

In these new and daunting times, learning to work effectively from home, juggle your commitments, still carry out research, and write papers will be key. Tune into this webinar and learn: how to manage your time and juggle other commitments while working from home, how to carve our space in your day using the pizza box method, and how to modify your schedule, be flexible, and still get lots of research and paper-writing done.

### Our speaker

**Heidi Toivonen** is a Finnish Doctor of Psychology with 10+ years of experience of client work. Currently, she is based in the Netherlands where she does research and works as an online psychologist and academic trainer. She is very interested in human agency (sense of awareness, mastery, and control) and is currently studying human agency in interactions with technology. Both as a clinician and as a researcher she is interested in topics related to work, such as efficiency, high achievement, and technology use. Heidi also has a special interest in intercultural psychology.

**Charlesworth**  
Author Services

**Charlesworth Group** is a high-quality publishing services company, specializing in the academic and professional sectors. The Charlesworth Group works with universities, institutions, research groups, and third party training providers to develop and deliver training workshops aimed at Early Career Researchers (ECRs) and graduate students (MSc and PhD).

## How to write and publish your papers in high impact journals

**Where:** Virtual meeting

**When:** 08th October 2020, 8:00-9:00 UTC

**How much:** Free

Researchers want to get their work published in the best journals possible, the ones with the highest reach and impact factors. This webinar will show you how to maximise your potential writing and publishing work in leading international journals; we will pass on tips and tricks from our many years of experience writing and managing the publication process. This is a webinar you simply can't afford to miss!

### Our speaker

Heinz U. Lemke is professor of Computer Science, who teaches and conducts research on Computer Assisted Medicine at the Technical University of Berlin. He is the editor-in-chief of the International Journal of Computer Assisted Radiology and Surgery (IJCARS), and executive director of the International Foundation for CARS. Heinz Lemke has been a consultant to many major medical technology companies and health care institutions and was co-founder and board member of professional societies such as ISCAS, EuroPACS, CURAC, EPMA and SCAR.
